Comments/Notes: Do you ever have used (or new) MX motors for sale?

Equipment: Handpiece Repair

Item #	Quantity	Make	Model	S/N	Problem
1	1	Bien Air	MX Motor Model 1600375	SNO5K0435	The "top" retaining screws "broke" and comes out of the motor when the motor is pressurized. Also, the motor is missing the light bulb sleeve and I would like a new sleeve.
2	1	Bien Air	MX Motor Model 1600375	SN08C0161	The docking hose "melted" into the back of the motor. I tried to remove the black plastic from the docking area but it appears to have damaged the electrical contacts of the motor so I gave up. This motor will need a new "dock" and also a lightbulb sleeve.
