Equipment: Small Equipment Repair

Item #	Quantity	Make	Model	S/N	Problem
1	1	kavo	electrotorque plus	00013942	back plastic screw was stripped and couldn't get it loose so pryed open unit with screwdriver and broke faceplate screw connectors and tore wire housing connection to faceplate - original problem was lack of sufficient water flow through handpiece which we traced back to motor and/or interior water connection possibly corroded/partially blocked
